

PROGRAM OUTCOMES (POs)

At the end of the program the student will be able to:

PO1	Apply theoretical knowledge of principles and concepts of Forensic Science to practical problems.
PO2	Develop approaches with a concern for accuracy and precision in significance to science and technology.
PO3	Identify, formulate and solve scientific problems based on design, experiment, data interpretation and analysis of results
PO4	Investigate various problems and ways to solve which will be very beneficial to society.
PO5	Show ability in using modern tools for design and analysis.
PO6	Work in teams on multi-disciplinary projects in research organizations and industries.
PO7	Build up communication skills, both written and oral, to specialized and non-specialized audiences.
PO8	Develop the ability to critically evaluate theories, methods, principles, and applications of pure and applied science.

Program Specific Outcomes (PSO)

PSO 1: Empower students with knowledge and skills of advanced techniques in various disciplines of Forensic Science.

PSO 2: Develop expertise in a specific discipline of Forensic discipline by solid theoretical background and practical knowledge.

PSO 3: Gain understanding of quality management of Forensic Science laboratories as prescribed by ISO and NABL.

PSO 4: Design and implement research based solution to complex forensic and legal issues.

PSO 5: Apply analytical and state-of-art techniques for examination of forensic exhibits and evaluate results.

PSO 6: Apprise students with research in various fields of forensic science and familiarize them with writing and publishing of articles in journals.
